THE ART OF ATTRACTION

A compelling force that is impossible to deny.

As children, we played with magnets with great fascination. Turning them one direction, there was no way to bring them together. Yet with just a slight twist, it was impossible to keep them apart. It makes us wonder now how many things that seem like obstacles could be overcome when viewed from a different angle. Success comes when these obstacles are overcome and success should be acknowledged in an appropriate, continual manner.
